第五届国际聚氨酯高峰论坛

The 5th International Polyurethane Summit in China

2011年11月17日至18日 海南 三亚君澜度假酒店

17-18 November 2011 Narada Resort & Spa Sanya, Hainan Island, China

会议背景/Conference Background

2011年受油价飙升冲击，全球聚氨酯原材料价格已涨至无法承受的地步。虽然年初市场行情有所缓和，但生产成本依然高位运行，随着原料价格持续高攀，某些稳健市场也面临严峻考验

面对这些挑战亚洲市场也同样拥有其不错的机遇。对于保温行业聚氨酯已成为首选材料，该领域依然有巨大的发展空间；对于汽车行业聚氨酯需求量恢复要比预期快，尤其是亚欧市场；对于聚氨酯厂商来说，亚洲市场仍表现出强劲的增长潜力，虽中国和印度地区受融资约束以及通货膨胀的冲击，但其聚氨酯行业却依然保持强劲涨势。

鉴于以上市场状况，继过去四年来成功举行国际聚氨酯峰会Puworld将继续携手 Tecnon 于今年 11 月 17-18 日于三亚召开第五届国际聚氨酯峰会，共同探讨聚氨酯行业主要问题。

The global polyurethane industry in 2011 has been confronted by soaring crude oil values which have pushed raw material prices to an unsustainably high level. Although the highs seen the beginning of the year have now eased, production costs remain high. Manufacturers, faced with escalating costs and narrowing margins, have sought to pass increases further down the supply chain, but the robustness of some market sectors has been severely tested by successive price hikes.

Future prospects for the polyurethane business are sound, and significant global investments have been still announced this year particularly into tremendous capacity. Polyurethane has become the material of choice for insulation, and this area still offers huge potential. Demand from the auto industry has recovered much faster than anticipated, particularly in Europe.

Following the success of the last four years' International Polyurethane Summit in China, Tecnon OrbiChem and Puworld will be holding the 5th International Polyurethane Summit in Asia China on 17-18 November in Sanya.
